Professional Summary

Backend and DevOps-focused Developer skilled in Spring Boot, PostgreSQL, Docker, Jenkins, and GCP. Experienced in building microservices, REST APIs, and CI/CD pipelines, with a strong foundation in Java and system design. Passionate about backend development, cloud automation, and scalable solutions.

Technical Skills

Languages: Java, Python, JavaScript, C

Frameworks: Spring Boot, Flask, React.js, Next.js

Databases: PostgreSQL, MySQL, MongoDB

Cloud/DevOps: Docker, Jenkins, GCP, CI/CD, Nginx

Tools: Git, GitHub, IntelliJ IDEA, Eclipse, VS Code

Other: RESTful APIs, Microservices, JUnit, Mockito, DSA

Experience

Software Developer – Amigo Nexus Technology [🔗](#) | Oct 2024 – Present

- Built and maintained **Spring Boot microservices** for travel invoicing software using **PostgreSQL**, improving performance and reliability.
- Developed **auditing** and **merge microservices**, optimizing monitoring and **reducing** infrastructure **costs**.
- Automated **CI/CD** pipelines and **db backups** using **Docker**, **Jenkins**, and **GCP** with **auto email** delivery to admins.
- Collaborated on **React.js** modules and performed **JUnit & Selenium** testing, ensuring smooth integration and code quality.

Software Developer Intern – North Star Metrics | Jul 2024 – Sep 2024

- Built React.js and Tailwind CSS web pages with Redux Toolkit for state management.
- Integrated APIs using Axios, improving data flow consistency.

Projects

PlayNear [🔗](#) | Next.js · Spring Boot · Microservices Architecture · PostgreSQL · JWT Security

Developed a **full-stack sports venue booking platform** with three user roles (**Admin, Owner, User**) and **JWT** authentication. Implemented **location-based search** using the **Haversine formula**. Developed a responsive **Next.js** frontend integrated with a **Spring Boot REST API** and **PostgreSQL** database. Added structured **backend logging** and performed **unit testing** to ensure reliability, maintainability, and performance of core services.

Driver Drowsiness Detection System [🔗](#) | Python · CNN · OpenCV · Dlib · Machine learning

Developed a **real-time driver drowsiness detection system** using computer vision and **deep learning** techniques. Implemented a **Convolutional Neural Network (CNN)** to analyze eye regions for drowsiness detection, **utilizing OpenCV** for video capture and **Dlib** for **facial landmark detection**. The system continuously monitors the driver's eyes and provides alerts to enhance safety when signs of drowsiness are detected.

Education

M.Sc. Computer Science, Pune University (**PUCSD**) — 2022–2024 | CGPA: 7.3

B.Sc. Computer Science, N.V.P. College, Lasalgaon — 2019–2022 | CGPA: 9.31

Achievements

- Solved 280+ DSA problems on LeetCode.
- Volunteer at AVISHKAR 2023, SPPU Pune.
